# MACHINE MONITORING & ANOMALY DETECTION

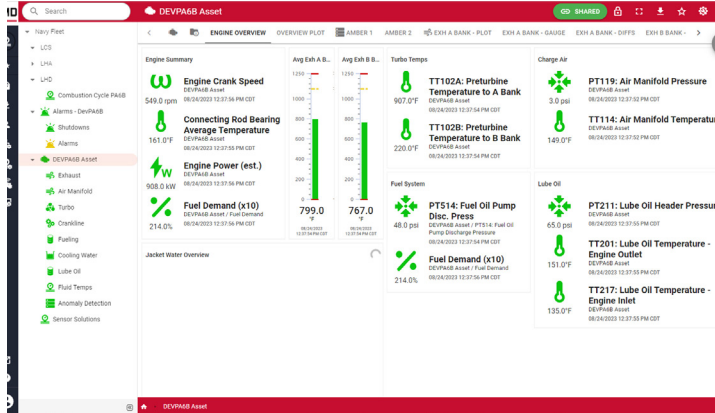

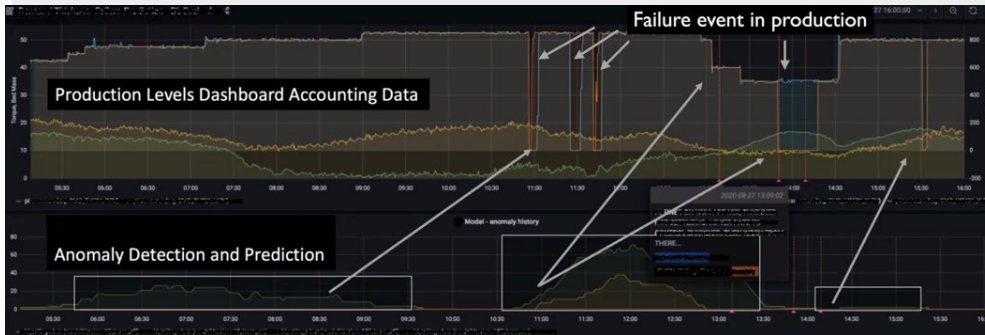

At Fairbanks Morse Defense, we revolutionize asset management with our cutting-edge anomaly detection and machine monitoring solutions. Imagine having the power to identify irregularities in real-time, predict potential failures before they happen, and quickly pinpoint the root causes of issues. Our technology not only empowers you to make informed decisions but also guides you to the right repairs, ensuring successful interventions from the start.

## Benefits:

- Significant Reduction in Unplanned Maintenance
- Improved First Time Fix Rate
- Increased Operational Availability
- Streamlines Root Cause Analysis & Diagnosis

Scan to watch FM  
OnBoard in action.

## Key Features

- Configurable Data Dashboards
- Real-Time Tracking
- Data Visualization & Reporting

## Features That Take It Further

- Machine learning algorithm that detects and reports negative changes to asset performance
- Immersive Monitoring in 2D and 3D
- 'Maintenance Brain' - an on-premise and cloud-based data historian that visualizes and reports asset health and stores identified anomaly clusters

## STACKING THE DECKS

Fairbanks Morse Defense is revolutionizing technology solutions for today's maritime defenses.

Mission-driven and honor bound, our commitment is to equip the U.S. fleet with the latest technological innovations and strategic solutions.
