

EXTEND YOUR ENGINE LIFE ANOTHER 20 YEARS

Don't Wait For Failures To Happen

Running a multi-engine plant can be labor intensive and difficult to learn. Let Fairbanks Morse take the headache out of running your engines with automated controls to help you safely start, stop, and shut down from one touch-screen location. Fairbanks Morse can train employees and have them up and running within two days, saving you months or years of training. Let us give you the peace of mind that your engines will be ready when your customers need them.

- Extend the life of your generator set for a fraction of the cost of new
- Save years in training
- Safely start, stop, and shut down
- Prevent failures before they happen
- Easy-to-use touch screen
- Save thousands with preventative maintenance

CUSTOMIZED SOLUTIONS TO MEET YOUR CRITICAL POWER NEEDS

Don't get caught with capacity gaps that can leave your city vulnerable to power outages. Invest in a long term maintenance plan that can save you millions over the life of your engines! Fairbanks Morse can take the guess work out of engine maintenance.

Maintenance Plans

- Certified training to keep your team safe
- Routine diagnostics to detect issues before they cost you
- Automated Controls to convert your engines to one easy-to-use platform
- 3- or 5-Year Plans with locked-in rates for easier budgeting
