ACCELERATE Your Technology

Supporting the
development of
maritime defense
technology

Are you a startup or small business with products or ideas applicable to defense technology? Do you have innovative ideas or disruptive technology that can revolutionize the way we protect our country? If so, the FM Defense Accelerator is the perfect opportunity for you and your growing business.

Introducing our FM Defense Accelerator Program - designed to help startups and small businesses develop their products and bring them to the defense market. Our program provides participants with access to world-class mentors, investors, and industry experts, as well as a network of like-minded entrepreneurs.

Throughout the program, participants will receive hands-on support to help them refine their business strategy, build a minimum viable product, and accelerate their growth. We'll provide guidance on topics such as product development, fundraising, customer acquisition, and more.

As a participant in the program, you'll have access to cutting-edge resources

and facilities, including fully equipped workspaces, advanced prototyping equipment, and testing facilities. You may also be eligible for funding, which you can use to further develop your product or idea.

At the end of the program, you'll have the opportunity to pitch your product to a panel of industry experts and potential investors. You'll also have the chance to network with other startups and connect with potential customers and partners.

If you're ready to take your product or service to the next level, apply now for our FM Defense Accelerator Program. We're looking for the next generation of defense innovators and we want you to be a part of it.
