

FAIRBANKS MORSE DEFENSE MANUFACTURING CAPABILITIES

Fairbanks Morse Defense offers a wide variety of manufacturing capabilities to accommodate the needs of our maritime defense customers.

General Manufacturing Capabilities

- CNC Machining
- Large Asset Machining (50ft Length)
- Plate Rolling, Bending, Forming, and Cutting
- Punching
- Heat Treatment
- Blasting
- Painting

Welding Capabilities

- Materials: Carbon Steel, Stainless, Alloys, Aluminum, HY80, Ductile Iron, CuNi, NiCu, Copper, Bronze, Brass, Monel
- GMAW/MIG
- GTAW/TIG
- FCAW
- SMAW
- Resistance Spot Welding
- Brazing

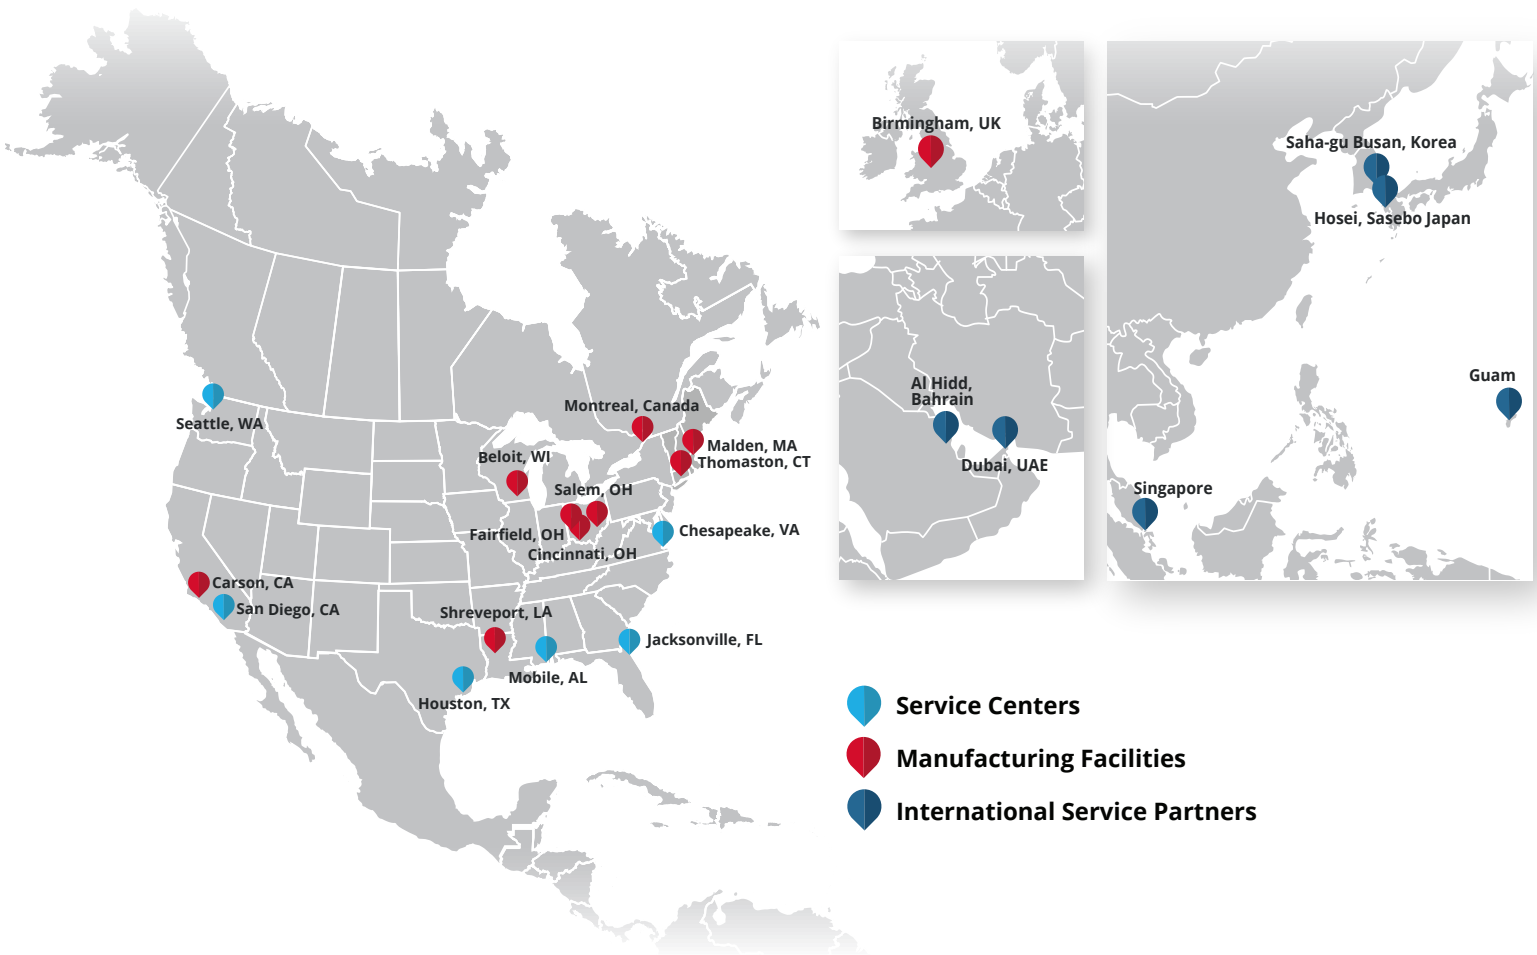

Quality Capabilities

- ANSI 17025 Accredited Laboratory (Hardness, Mechanical, Chemical, Failure Analysis, etc.)
- Coordinate Measuring Machines (CMM)
- Laser Inspection & Scanning
- Certified Weld Inspectors (CWI)
- ACCP Certified (VT, PT, MT)
- SNT-TC-1A Certified (VT, PT, MT, UT)
- Paint Adhesion & Film Thickness
- Hydraulic and Hydrostatic Testing
- Shock & Vibration Testing/Qualification

Welding Qualifications

- AWS D1.1, D1.2, D1.3, D11.2, D14.1
- ASME IX
- Tech Pub S9074-Aq-GIB/010/248
- ISO 9606

LOCATED WHERE YOU NEED US - Strategically located service centers throughout the globe enable Fairbanks Morse Defense to optimize manufacturing and production while ensuring replacement parts are readily at hand to maximize operational uptime.
